

# Stamps of Iceland 1872-1904

This third book of Henry Regeling is a detailed study of the Icelandic Skilling and Aurar stamps. The book starts with an introduction where Henry explains how the stamps came in existence, the specific distinctive marks and all other characteristics of the stamps there self. Here we also find all important data like stamp deliveries, postal rates, used cancels. The main part of the book is dedicated to detailed analyses of the 98 printings as well as the settings and plate errors and varieties that can be identified as well as there positions in the sheet.

The illustrations are very clean and clear and show the varieties and plate flaws scheduled by there values. The Þrír and the Í GILDI overprints are described as well. The so called Berne printings are not forgotten. Last but not least, we find information about the issued postcards. The book ends with an extensive literature list in which we find many articles, books and catalogues mentioned.
